

# Group Newsfeed Updates | June 2020

See your group in a new way! We made a few changes to enhance the group experience for you and your fellow group members. Check them out below!

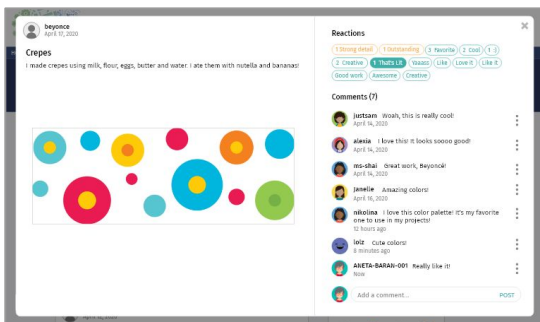

## New Look and Feel

Group news feeds now have a new style! In addition to updated colors and layouts, the news feed now presents posts in a linear structure: submissions are displayed from most recent to oldest, making it easier to follow.

## React and Comment from the Feed

Users can now add reactions and comments from the newsfeed itself. You can also see a subset of reactions and comments given to that post.

## Updated Submission Modal

Want to see all comments and reactions posted to a submission? Click on the artifact preview or “View All Comments” to see the revamped modal! From here, you can view all reactions and comments, and add reactions and comments yourself.
